Trim your tree and Trim your electric bill...

Get a rebate when you purchase LED Lights and Decorations to save energy & money—and give a little back to the environment

Light-emitting diode (LED) lights are a new application for a mature technology. Each year manufacturers have improved the choices, producing bigger and brighter bulbs and new color options. LED lights have a number of benefits over conventional lighting:

Energy efficient – LED lights use up to 90% less electricity compared to incandescents.

Long life – LED lights last up to 50,000 hours outdoors and 100,000 hours indoors.

Safe – There's no chance of combustion since the bulbs are cool to the touch, regardless of how long they are left on. The epoxy lenses are virtually indestructible.

Save money – Using LED holiday lights can save you up to \$21 per month.

Lamp replacement – If a bulb burns out, the other bulbs stay lit making replacement easy.

ENERGY STAR qualified holiday lights:

- Come with a three-year warranty, meaning fewer light string replacements.
- Are independently tested to meet strict lifetime and electrical requirements.
- Must pass weathering tests in order to be labeled for outdoor use.

Maximum rebate of \$200.00 per customer

Must be an electric customer of City of St. Charles Utilities to be eligible for the rebate and lights must be used in their service territory. Rebate cannot exceed purchase price. Rebate request must be submitted no later than December 31, 2011.
